Montevideo, Uruguay · Remote

Canadian, Italian (EU) and Uruguayan citizen. No sponsorship needed in Canada or the EU.

I build the tools behind outbound: how campaigns get planned and launched, how the right contacts get found, and how the email actually gets delivered. Most recently I ran revenue operations on my own at a recruiting company, across five brands. Before that I spent six years in growth and marketing operations, which is why the systems I build get used instead of shelved.

§ 01 Experience

Aug 2025 – Sep 2026 · Remote

Revenue Operations Manager, **TalentStream**

Sole revenue operations owner for a recruiting company placing remote talent with US and Canadian companies. Owned outbound, enrichment and email infrastructure across five brands.

- ◆ Built Campaign Ops, where we planned, launched and tracked every outbound campaign. Claude handled the planning, prospect search, copy and reply drafts, and the team approved each step
- ◆ Built Enrichment Ops, an API that finds personal emails, work emails and phone numbers by checking our own data first, then trying paid providers in order of cost
- ◆ Built Email Ops to track every sending domain and mailbox in one place, replacing five vendor dashboards and a spreadsheet
- ◆ Moved all sending and warm-up from two old platforms onto one stack and warmed 32 domains into production
- ◆ Found and fixed a Microsoft block that was stopping about 40% of our emails
- ◆ Built the outbound flow for new job postings, from the incoming webhook to the live campaign, running eight campaign lists from one table
- ◆ Set up automatic reply sorting in n8n, so nobody had to triage the inbox by hand
- ◆ Built a pipeline that scored interview recordings with an LLM and posted feedback to Slack, and a tool to monitor our AI recruiting agent's conversations
- ◆ Built a dashboard tracking our spend across about twenty AI, data and automation vendors

Aug 2022 – Dec 2024 · Montevideo, Uruguay

Marketing Executive, **VAIRIX Software Development**

Owned marketing for a software development agency serving US clients, and built the automation underneath it.

- ◆ Built lead generation and marketing operations workflows in n8n, Make and custom API integrations
- ◆ Built AI-assisted content engines for long-form and technical content
- ◆ Connected HubSpot, Webflow and the wider stack into one system
- ◆ Ran SEO and technical web performance work, and scaled outbound email programs

EARLIER

Apr 2021 – Apr 2022 **Marketing Manager, TowerHouse Studio** · Montevideo

Led marketing for a digital studio: demand generation, web presence and client campaigns.

Dec 2019 – Feb 2021 **CMO, Power Global Innovation** · Barcelona

Led positioning, channel strategy and a small marketing team at an early-stage company.

Jul 2017 – Dec 2019 **Founder and consultant, 1UP.uy** · Uruguay

Advised iGaming operators in Sweden and Malta on market research, growth and market entry.

Nov 2015 – Jul 2017 **Product Manager, HelloNets** · Montevideo

Ran development, SEO/SEM and growth for 80+ iGaming affiliate sites in Latin America.

§ 02 Selected work

Live demos of tools I built, running on sample data.

Campaign Ops

OUTBOUND CAMPAIGNS

Where we planned, launched and tracked every outbound campaign.

[campaign-ops-demo.netlify.app](#)

Email Ops

EMAIL INFRASTRUCTURE

Every sending domain and mailbox in one place, across the mailbox providers, Smartlead and DNS.

[email-ops-demo.netlify.app](#)

Cost Dashboard

VENDOR SPEND

What we spent across about twenty AI, data and automation vendors, each billed differently.

[cost-dashboard-demo.netlify.app](#)

Enrichment Ops

CONTACT ENRICHMENT

An API that finds personal emails, work emails and phone numbers.

[enrichment-ops-demo.netlify.app](#)

Agent Chat

AI AGENT MONITORING

Every conversation our AI recruiting agent had with clients, across Slack, phone calls and email, in one chat view.

[agent-chat-demo.netlify.app](#)
